James Mallen

Student Number: 19346861

Submission Date: 21th April 2021

For this project I decided to choose option 1 and made a website for a high end sit-down Italian Restaurant.
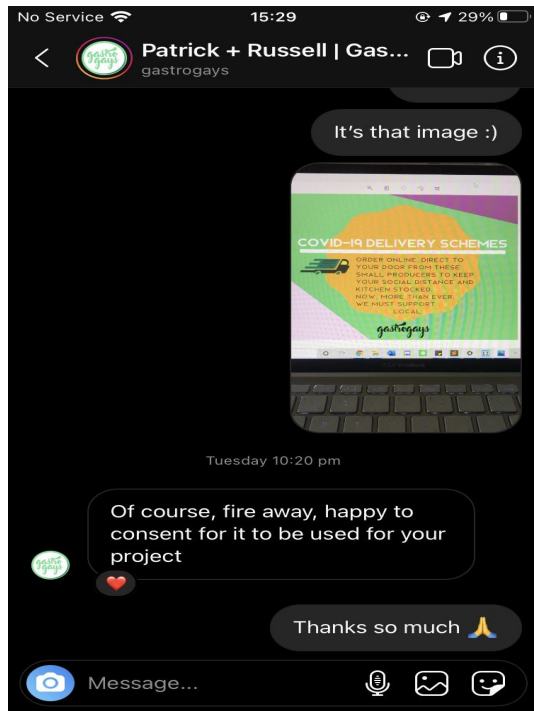

Sources for videos & photos:

Home Page video:

https://pixabay.com/videos/pasta-food-pastas-eat-nutrition-33256/

I then uploaded this to a simple black and white filter website to give it a more formal luxury look.

Covid Delivery Image:

https://gastrogays.com/covid-irish-food-deliveries/

I got permission from this company to use their image in my project.

The main features of my website are:

- Nav Bar when minimised to mobile size it is pushed to the side, using JS and a burger div it is sent to the side of the page
- Smooth scrolling animation for navigation from the NavBar
- Background video as home page
- "Extend" button using JS to hide information on demand
- Awesome fonts used for valentines offer
- Contact form and Copyright footer
